PERSONAL PROFILE

Frontend Developer experienced in building scalable and responsive web applications using React, Next.js, and TypeScript. Skilled in developing dashboards, analytics platforms, and API integration systems. Passionate about creating intuitive user interfaces, optimizing performance, and delivering high-quality user experiences.

WORK EXPERIENCE

Frontend Developer

Infowareindia | May 2024 – present

- Developed and maintained a Learning Management System using React, Vite, and TypeScript, building dashboards for course management, user tracking, and training analytics.
- Built user-friendly frontend modules for patient management, appointment scheduling, and billing dashboards to improve usability for hospital staff.
- Designed and implemented frontend components for an inspection auditing platform, enabling inspectors to submit reports, manage tasks, and track compliance through interactive dashboards.
- Developed frontend interfaces for an API marketplace where users can explore, purchase, and manage document verification APIs with clear usage insights.
- Built dynamic UI for configuring inbound and outbound APIs used by voice agents, allowing users to manage integrations and workflows through an intuitive interface.
- Created data visualization dashboards to display NLP query analytics, integrating charts and filters to help monitor query trends and system performance with the help of AI.

PROJECTS

Voice Agent API Configuration Platform

- Built a dynamic UI for configuring inbound and outbound APIs for AI voice agents.
- Implemented API configuration forms and workflow management using React and TypeScript.

NLP Query Analytics Dashboard

- Developed a data visualization dashboard displaying query trends, filters, and performance metrics.
